Partnership

weXelerate

- Largest start-up hub in Europe
- Mission: bring young companies, established players, and investors together to move forward with innovative business models
- OeKB and ACREDIA are involved as corporate leaders
- Open innovation approach

How we managed to implement the SDGs

OeEB can make a significant contribution to achieving the goals for the following SDGs:

Facts and Mission Statement

- OeEB was founded in 2008 as the officially mandated Development Bank of Austria and is a 100% subsidiary of OKB
- OeEB aims to create better living conditions in developing and emerging countries through a vibrant economy
- It provides long-term finance for private sector projects that are economically sustainable and have a positive impact on development
- 3 product lines: investment lending, equity participations and Business Advisory Services
- Steady growth of loans and equity participations from 2008 to 2017

Wind Farm - Panama

- Penonome wind farm
- OeEB contribution: USD 25 mn to IFC's USD 191 mn financing for the construction of the Penonome wind farm – largest wind farm in central America

Partnership

- OeEB and ILF: renewable energy developer
- Mission: to realize sustainable and profitable projects in emerging and developing countries
- Provides financing and know-how to select, develop and implement projects in the field of hydro- and wind power as well as photovoltaics based on profound knowledge in finance and engineering.
- regional focus lies on South East Asia (particularly Laos)

CEO Insights: Partnering for the SDGs in Practice

Victoria Williams
GlaxoSmithKline

GlaxoSmithKline

- 9th largest global Pharmaceutical company
- Broad range of therapy areas but mainly focused on HIV/AIDS, Respiratory, Vaccines, Consumer Healthcare products
- Annual revenue £30bn
- 98,000 employees
- Highly competitive environment and constrained pharma patent life drives need for constant R+D innovation (£4.5bn spend on R+D in 2017)
- Our purpose is to help people do more, feel better and live longer.
 - Social impact is central to this purpose
 - We see sustainability issues such as tackling global health challenges; access to healthcare and developing an engaged, diverse and healthy workforce as key opportunities to create value for the business and society

Our purpose is to help people do more, feel better, live longer

Global Compact
Network Austria

Innovation

By using our science and technology

to address health needs

New medical innovations

Develop differentiated, high-quality and needed medicines, vaccines and consumer healthcare products to improve health

Global health

Improve global health impact through R&D for infectious diseases that affect children and adolescents in developing countries focusing on HIV, malaria and TB

Health security

Help the world to better prepare for future disease outbreaks with pandemic potential, and tackle antimicrobial resistance

Performance

By making our products affordable and available

Pricing

Improve the health of millions of people each year by making our products available at responsible prices that are sustainable for our business

Product reach

Use access strategies to reach 800 million underserved people in developing countries with our products by 2025

Healthcare access

Partner to improve disease prevention, awareness and access to healthcare services for 12 million people by 2025

Trust

By being a modern employer

Engaged people

Achieve and maintain a competitive employee engagement score by 2022

Inclusion and diversity

Accelerate our progress on inclusion and diversity, aiming for over 37% female representation in senior roles and recognition in global LGBT+ indices, by 2022

Health, wellbeing and development

Be a leading company in how we support employee health, wellbeing and personal development

How we managed to implement the SDGs?

Tackling Malaria, support of goal 3 and 17 (good health and wellbeing and partnership)

Global Compact
Network Austria

- Malaria is the largest killer of children; one child dies every 30 seconds, about 3000 every day. Most cases in Sub-Saharan Africa
- We are fighting Malaria in the lab and on the ground:
 - FDA approval of Krintafel (tafenoquine), a single dose treatment for *P. vivax* malaria developed in partnership with the Medicines for Malaria Venture, the Bill and Melinda Gates Foundation and PATH to enable patient access for those who need it. (SDG 3 and 17)
 - Our RTS,S vaccines (*P. falciparum*) is only candidate vaccine to receive positive scientific opinion from EMA and recommendation for pilot from WHO in sub-Saharan Africa.
 - Working with WHO, PATH, the ministries of health in Kenya, Ghana and Malawi and other stakeholders to ensure successful implementation. 10 million doses will be donated in pilot programme.
 - Partnership with Comic Relief; we are supporting 20 projects across Africa and Asia focused on fighting Malaria and improving health. Ensuring that the interventions to prevent, diagnose and treat Malaria get to the people who need them, when they need them.
 - Projects in Tanzania, Ghana and Mozambique launched in 2017 have already reached 700,000 people
- GSK has been working on Malaria for 30 years however, having goal 3 has been useful as a rallying-cry to help mobilise others and has reaffirmed our commitment to the issue
